TECHNICAL SKILLS

Machine Learning

Python, PyTorch, TensorFlow, scikit-learn, Hugging Face, foundation models, LSTM, Autoencoders, time-series modeling, anomaly detection, feature engineering

Software & Data

Docker, Linux, SQL, Slurm, cluster-based workflows, data preprocessing, model evaluation, experiment design, research prototyping

Programming

Python, SQL, Java, R

Tools

Git, VS Code, Colab, Jupyter, VirtualBox

LANGUAGES

English: Fluent

Hebrew: Fluent

French: Native

EDUCATION

M.Sc. Data Science

Ben-Gurion University
Meitar Excellence Program
Current student

B.Sc. Data Engineering

Ben-Gurion University
Completed
Data Structures (97), Computational Models (99)

PROFESSIONAL SUMMARY

M.Sc. Data Science student and Data Engineering graduate with hands-on experience building machine learning models, data pipelines, and research software. Strong foundation in Python, SQL, Java, and Linux, with applied work in anomaly detection, recommendation systems, and time-series modeling. Comfortable turning research ideas into reproducible experiments and practical software.

RESEARCH EXPERIENCE

Time-Series Modeling Research (Master's Research)

Built end-to-end workflows for time-series forecasting, including preprocessing, exploratory analysis, model training, and evaluation. Compared deep learning and statistical approaches, analyzed temporal patterns, and translated experimental results into clear research conclusions.

Anomaly Detection in Multi-Sensor Time Series

Designed autoencoder-based reconstruction models for anomaly detection across multi-sensor data. Implemented preprocessing, sensor alignment, thresholding, and evaluation pipelines for reliable experimentation.

Recommendation Systems Research (Deezer Paper Extension)

Reproduced and extended sequential recommendation models with improved embeddings, sequence modeling, and structured evaluation of ranking performance.

EXPERIENCE

CyberBGU – AI Integration Research

2024-now
Partnered with RAD to integrate AI-driven optimization into Industrial Control Systems (ICS), aiming to improve network load efficiency and operational performance.

Samsung - Technical Support

2020
Resolved technical issues under time pressure and communicated solutions clearly to customers.

Math Tutor

2016-2018
Private tutoring in mathematics and analytical problem solving.

MILITARY SERVICE

Israeli Air Force - F-16 Aeronautics Technician (Sergeant Major)

Diagnosed mechanical and electronic faults in real-time, safety-critical systems.

VOLUNTEERING

PERACH mentoring | Special-needs youth support | Holocaust survivor visits
